FEATURES
- Field-Bus remote data acquisition
- Modbus Slave device on RS-485
- Modbus RTU/Modbus ASCII protocol
- 4 digital inputs
- 8 digital outputs type PNP
- Watch-Dog alarm
- 2000 Vac galvanic isolation on all ways
- High accuracy
- UL / CE mark
- In compliance to EN-50022 DIN rail mounting

GENERAL DESCRIPTION
The device DAT 3188/4 is able to acquire up to 4 digital inputs and to drive up to 8 transistor outputs type PNP. The data are transmitted with MODBUS RTU/MODBUS ASCII protocol on the RS-485 network (RS-232 interface is available). The device guarantees high accuracy and stable measure versus time and temperature.

To ensure the plant safety, two Watch-Dog timer alarms are provided.

The isolation between the parts of circuit removes eventual ground-loop effects, allowing the use of the device even in the heavy environmental conditions.

The DAT 3188/4 is in compliance with the Directive UL 61010-1 for US market and with the Directive CSA C22.2 No 61010-1 for the Canadian market.

The device is housed in a rough self-extinguishing plastic container which, thanks to its thin profile of 17.5mm only, allows a high density mounting on EN-50022 standard DIN rail.

COMMUNICATION PROTOCOLS
The DAT3188/4 is designed to work with the MODBUS RTU/MODBUS ASCII protocol: standard protocol in field-bus; allows to directly interface DAT3000 series devices to the larger part of PLCs and SCADA applications available on the market.

For the protocol instructions, refer to the User Guide of the device.

USER INSTRUCTIONS
Before to install the device, please read the “Installation Instruction” section.

If the module configuration is unknown, with device powered off, connect the INIT terminal to the GND terminal (ground), at the next power on the device will be auto-configured in the default settings (refer to the User Guide of the device).

Connect power supply, serial bus, digital inputs and outputs as shown in the “Wiring” section.

The ‘PWR’ LED state depends on the working condition of the device: see the “Light Signalling” section to verify the device working state.

To simplify handling or replacing of the device, it is possible to remove the wired terminals even with the device powered.

TECHNICAL SPECIFICATIONS (Typical @ 25 °C and under nominal conditions)

**DIGITAL INPUTS**
- **Number of Channels**: 4
- **Input voltage**: OFF State : 0÷3 V (bipolar)
- **Input impedance**: 4.7 KOhm
- **Sample time**: 5 ms

**DIGITAL OUTPUTS**
- **Number of Channels**: 8
- **Type**: PNP
- **Voltage**: 10.5÷30 Vdc
- **Max. Load**: 500 mA per channel(*)
- **Inductive Load**: 48 Ω – 2H max
- **(*) Protection against over-current and over-temperature**: Short circuit current 1.7 A max.
- **Data Transmission**: Baud Rate 115.2 Kbps, Max. distance 1.2 Km – 4000 ft

**POWER SUPPLY**
- **Power supply voltage**: 10 – 30 Vdc
- **Reverse polarity protection**: 60 Vdc max
- **Current consumption**: 45 mA max

**ISOLATION**
- **Between all ways**: 2000 Vac, 50 Hz, 1 min

**ENVIRONMENTAL CONDITIONS**
- **Operative Temperature**: -10°C .. +60°C
- **UL Operative Temperature**: -10°C .. +40°C
- **Storage Temperature**: -40°C .. +85°C
- **Humidity (not condensed)**: 0 .. 90 %
- **Maximum Altitude**: 2000 m
- **Installation**: Indoor
- **Category of installation**: II
- **Pollution Degree**: 2

**MECHANICAL SPECIFICATIONS**
- **Material**: Self-extinguish plastic
- **IP Code**: IP20
- **Wiring**: wires with diameter 0.8÷2.1 mm² / AWG 14-18
- **Tightening Torque**: 0.5 N m
- **Mounting**: in compliance with DIN rail standard EN-50022
- **Weight**: about 150 g.

**CERTIFICATIONS**
- **EMC (for industrial environments)**
- **Immunity**: EN 61000-6-2
- **Emission**: EN 61000-6-4
- **UL**
- **US Standard**: UL 61010-1
- **Canadian Standard**: CSA C22.2 No 61010-1
- **CCN**: NRAQ/NRAQ7
- **Typology**: Open Type device
- **Classification**: Industrial Control
- **Equipment**:

**File Number**: E352854
INSTALLATION INSTRUCTIONS
The DAT 3188/4 is suitable to be mounted on DIN rail, in vertical position.
For a correct working and a long life of the device, read the following indications.

In case of the devices are mounted side by side, please leave about 5mm between in the following situations:
- Temperature in the cabinet higher than 45 °C and high supply voltage (>27Vdc).

Avoid to place raceways or other objects which could obstruct the ventilation slits. It is suggested to avoid that devices are mounted above appliances generating heat; their ideal place should be in the lower part of the panel.
Avoid to install the devices in a site where vibrations are present.
It is recommended to use shielded cable for connecting signals. The shield must be connected to an earth wire provided for this purpose. Moreover it is suggested to avoid routing conductors near power signal cables.

MECHANICAL DIMENSIONS (mm)

The symbol reported on the product indicates that the product itself must not be considered as a domestic waste.
It must be brought to the authorized recycle plant for the recycling of electrical and electronic waste.
For more information contact the proper office in the user's city, the service for the waste treatment or the supplier from which the product has been purchased.

HOW TO ORDER
In the order phase it is mandatory to specify interface type (RS485 or RS232).
DAT 3188 / 4 / 485

Interface type:
485 : RS-485
232 : RS-232

= Mandatory
= Optional

The symbol reported on the product indicates that the product itself must not be considered as a domestic waste.
